

Meeting with Nikita at 4:30pm on monday the 17th

Team members in attendance: all except peter (had doctor's appointment)

Meeting was short but we talked about many different things

- 1) We're a bit behind so she isn't capable of grading us during the time of the meeting so we need to catch up, have necessary files up and running, and send her an email
- 2) We need to make sure that we reread the project guide so that we understand what the rubric is and what we need to have done before the meeting with her
- 3) Tasks are to be assigned BEFORE meeting, so that we can tell her what the team's plan is for the following week
- 4) Need to communicate more as a team
- 5) Tasks nikita told us to do:
 - a) By wednesday we need to finish login register and database
 - b) Need to do the wireframe
 - c) Break down task on project board
 - d) By monday find out how we want to use the apis (should be 100 % understand by monday)
 - e) Home page done by monday
