

Team meeting with nikita scrib 3

Meeting is on 5/1/2023 at 4:30 pm

Members in attendance: kailash, peter, joey, tj , and andrew

In this meeting we gave a demo of all the different things we have completed so far. We showed every feature and the only two features that weren't shown were the settings page and the buttons on the profile page that will allow the user to edit or delete their own post. Then after the demo we had to discuss stuff involving the repo and our contributions but after, we discussed what comes next, which was presentation slides and the report

- The presentation is going to be 10 minutes long and then after we have 5 mins of Q&A
 - So we need to practice our presentation to make sure we have it done in 10 minutes
- We need to look on to the project guide again as it will tell us everything we need to include in our presentation
- Nikita gave tips on how to complete it and what should be done

After the presentation talk we discussed the last few things that should be done, which is the settings page and the edit/delete post buttons on the profile page

Besides all of this, was given compliments about the project so thats a good thing!
